Cyber Services Program
Disaster Recovery Planning

Ensure Continuity Through Tested Backup and Recovery Strategies

♡ Purpose of the Service

Disruptions from cyberattacks, hardware failures, or natural disasters can impact your ability to operate. TML Risk Pool's Disaster Recovery Planning service helps your organization think through recovery priorities, document key systems, and ensure that reliable, offline backups are in place and regularly tested.

✪ What's Included

• A 60–90 minute consultation (virtual or in-person) with leadership and IT support
• Discussion of core systems, backup schedules, and recovery objectives
• Review of backup configurations, including the presence of offline or immutable backups
• Guidance on documenting a disaster recovery plan appropriate for your size and resources

≡ What You'll Receive

• A disaster recovery planning checklist and template
• Best practices for maintaining offline backups and testing recovery procedures
• Written recommendations for improving resilience and recovery readiness sample

👥 Who Should Participate

• IT Leads, Department Heads, City Managers, Emergency Managers, and Risk Managers
• Anyone responsible for continuity of operations or data protection

⏲ Time Commitment

• Approximately 60–90 minutes
• Scheduled at your convenience with TML Risk Pool Cyber Services staff

$ Cost

• This service is provided at **no cost** for TML Risk Pool Members with cyber insurance from the Risk Pool
